For general use across the site for bodycopy. This is an Adobe font.

WEBSITE COLOURS:

#000000 #bdf00 #ffd6bb #b0b0ff #b8fee #6d6e71

GENERAL NOTES:

- The Home page and About page are each housed within their own labelled group in the psd.
- There are two other groups that contain the spacers used for developer’s reference, but obviously not to be included in the finished site.
- The psd has guides to show the grid, feel free to adjust the grid to suit browsers and responsive grids etc. better if you prefer. This is simply a visual guide.
- Header should pin, may need a slight shadow under for contrast when scrolled over green blocks.
- We would Ideally like to incorporate a light level of interaction / animation. Perhaps just slight panning movement on the hero image, animating / light transitioning in of the feature text, a little bit of easing on the content blocks as they are scrolled etc.
- We need some level of interactivity with all buttons and links when hovered over.
